

### Instructions

1. Photocopy, laminate and cut up the cards.
2. Randomly distribute them around the class, ensuring that the teacher's card (shaded grey) is kept by the teacher. Any spare cards should be given to students who can cope with more than one, or kept by the teacher.
3. Explain to students that the answers are on the second half of the domino card. When they hear a question to which they think they know the answer, they should shout it out. If they are correct, they then read out the question on the first half of the card.
4. If the game 'breaks down' because the answer has not been recognised, the class should discuss what the answer might be so that the student can recognise their answer.
5. The game ends when all questions and answers have been read out—this should be when the teacher reads out the answer from their card, which began the game.
